PROFESSIONAL SUMMARY

AI/GenAI Engineer (CGPA: 9.2) specializing in Agentic AI, multi-agent systems, and RAG pipelines using Python, FastAPI, and LangChain/LangGraph. Experienced building workflow automation and data quality automation solutions on GCP, with a strong CI/CD and API-engineering foundation.

TECHNICAL SKILLS

Agentic AI & LLMs: LangChain, LangGraph, MCP, RAG, Prompt Engineering

Python & APIs: Python, FastAPI, REST APIs, Git, GitHub

Automation: Workflow Automation, Data Quality Automation, ETL Pipelines

Cloud & Tools: GCP, CI/CD, GitHub Copilot, Claude Code, Cursor AI

EXPERIENCE

Data Science Intern | Affine

Jan 2026 – Aug 2026

- Built AI/ML automation pipelines in Python and SQL for data cleaning, transformation, and ETL across cloud-native (GCP) datasets, applying data quality automation practices.
- Developed an AI-powered PowerPoint automation workflow converting Excel datasets into presentation-ready slides using an agentic AI workflow with LLM-driven insights.
- Designed multi-agent AI workflows (RAG-based) with guardrails for automated decision-making; built Power BI dashboards for cross-functional stakeholders.

Python & GenAI Intern | Evolve Robot Lab

Jun 2024 – Aug 2024

- Built an AI-powered, context-aware chatbot using Generative AI, Python, and NLP with multi-turn dialogue and prompt engineering, improving user interaction accuracy.
- Integrated NLP pipelines in a Git-based, Agile team environment, resolving model performance issues through iterative evaluation and testing.

KEY PROJECTS

AI Job Assistant — Agentic AI · LangChain · RAG · FastAPI: Agent orchestration platform where autonomous agents reason, plan, and coordinate workflows; REST APIs for resume analysis and job matching.

Crowd Density Detection Dashboard — YOLOv8 · Vertex AI · Power BI · GCP: Real-time computer vision system for crowd density detection and bottleneck prediction.

Krushak App — Plant Disease Detection — TensorFlow · React.js · GCP: Computer vision model for plant disease classification with multilingual remedies.

EDUCATION

B.Tech. Computer Science Engineering — Bharath Institute of Higher Education and Research — CGPA: 9.2 (2022–2026)

Senior Secondary (XII) — Sri Chaitanya Junior College — 89.7% (2020–2022)

Secondary (X) — Sasi English Medium High School — GPA: 9.2 (2020)

ACHIEVEMENTS & CERTIFICATIONS

- Shortlisted among 9,500+ teams at Google Cloud India's Guinness World Record Agentic AI Hackathon.
- HackerRank Certified in Python; hands-on with GitHub Copilot, Claude Code, and Cursor AI.
